Quezon City

Dear Engr. Basean:

Greetings!

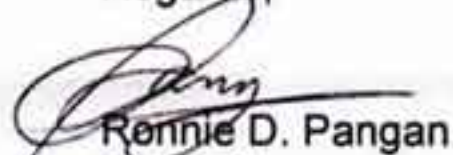

As you may have already seen and heard from various media coverage, Manila Ocean Park, the first Oceanarium in the country has already opened. Over a hundred schools since the last week of February has already brought in thousands of students to see this latest educational trip destination. The Oceanarium showcases what can be found beneath the Philippine waters as our country has been recognized to be in the center of marine diversity in the entire world.

We are inviting more schools to appreciate the richness and beauty of Philippine marine life and our Oceanarium is definitely a must-see new place for all students, teachers and parents. We not only display beautiful species but we also actively educate people on the importance of the preservation and conservation of our resources through our exhibits and inter-active programs.

In this regard, we would like to participate in your upcoming general assembly as an exhibitor. We would also like to do a 30-minute presentation on what you can expect when you visit Manila Ocean Park.

We hope to receive your reply soon.

Regards,

Ronnie D. Pangan
Sales Manager
