Mr. Butch Evarola
Mr. Allan Arellano

Dear Ma'am:

Greetings from the Ninoy and Cory Aquino Foundation (NCAF)!

As part of the **iamninoy-iamcory campaign**, which calls on the youth to live a life of love and service for the Filipino people, we have partnered with the Tanging Yaman Foundation (TYF) and UP Industrial Engineering Club (UP IEC) to hold a community solutions ideas competition for students and out-of-school youth.

Called **Indie Eng'g**, short for Indigenous Engineering, the contest challenges groups of young people to tackle pressing problems in their communities, and propose solutions for them using Industrial Engineering (IE) and Operations Research (OR) concepts. The contest is divided into two brackets: Bracket A for college students from IE, OR, or related fields, and Bracket B for high school students and barangay-sponsored out-of-school youths.

On the first year of this unique contest's implementation, we hope to see the best ideas from as many young people as possible from all over the Philippines. Thus, we are inviting students from your schools to register for **Bracket B** of the contest. Attached here are our contest mechanics and registration details

We are look forward to receiving entries from your school.

For inquiries and clarifications, please do not hesitate to contact Francis Dee at [+63917.8051851](tel:+63917.8051851) or through info@ncaf.ph.

Thank you for your kind attention.

Yours sincerely,

MS. MIKA MILLAR
Program Director
Ninoy & Cory Aquino Foundation
